PRESIDENT CLEVELAND has written a letter to a New York Democrat, declaring that the report that he is indifferent to the success of his party in that State at the coming election is "atterly false."

THE recent State census gives Massachusetts a population of 1,941, 456, being a gain of nearly 300,000 by the Senate, and Secretary Whitney by the Senate, and Secretary Whitney said at once that he could not be removed from his place, which is a civil position, by the judgment of a court-not confirmed.

PEORIA Transcript : The President is reported to have told a delegation which waited on him to demand the head of Fred Douglas, that if they would find a competent, respectable, colored Democrat to take his place. Fred would have to go. They have been on the hunt ever since, but as a lantern is required, and they are accustomed to hunting the colored man with shot guns, they will probably experience some trouble.

A western congresemen, now in Washington, thus discourses of the administration

I hear that the President recently said he would remove a Republican postmaster for such a cause only as would constitute grounds for the removal of a Democratic postmaster. I don't know whether Mr. Cleveland was rightly quoted; but if he was, what kind of an administration is this? To day I asked for the remo val of a Republican postmaster in my district, and mentioned to the Postmaster General the fact that he was the editor of a Republican newspaper. This seemed to strike Mr. Vilas as a pretty fair case of offensive partisanship; but when I said I wanted to get the editor of the Democratic newspaper made postmaster, he shook his head and eaid he did not believe that kind of a

The Special Delivery System-Foster's Success-Internal Revenue Collectors Appointed.

The Verdict in the Smith Court-Martial. WASHINGTON, D. C., October 7 .-The Court martial which tried Paymaster-General Smith of the navy, rendered a verdict dismissing him from the Bureau of Provisions and Clothing (of which he was chief), and suspending him for two years without pay. When Secretary Whitney came to review the proceedings and the finding, he said that the verdict could not be maintained. General Smith was nominated by the President for Paymaster General, and confirmed General Smith could only be removed by the appointment of his successor by the President and his confirmation by the Senate, The courtmant all was then ordered to recovene for the purpose of changing its finding and of rendering a verdict that would meet the requirements of law. It is believed that the revised verdict of the court will probably be dismissal from the naval service.

Lx-Minister Foster's Late Mission to Madrid.

WASHINGTON, D. C., October 7 .-- It is earned that Minister Foster's recent negotiations with Spain did not have in view unother reciprocity treaty, as was supposed, but looked to the establishment of freer commercial relations between the United States and the Spanish colonies, and especially to the lessening of the annoyances and mitigating the onerous regulations to which shipping merchants are subjected to trading with Cuba, and Mr. Poster has been at the State Department so frequently since his return, and although he and the department officials are very reticent on the subject, it is very generally understood that his recent mission was a success, and that he has succeeded in securing the frame-work of an important commercial treaty

WILSON'S, CONFESSION.

The Fact of His Horrible Deed Verified by Advices From Philadelphia. CHICAGO, ILL., October 7 .- The strange and wild story of John M. Wilson, who staggered into the Twelfth Street Police Station on Saturday night last, proclaim ing himself a murderer, is true. The folowing dispatch, received last night from Phhadelphia, confirms his tale: Philadelphia, confirms his tale:

"Hold Wilson He is wanted for murder of anthony Dale, who disappeared mystoriously about the middle of February, 1881, from his farm in Moutgomery, near Try Hill Cometers. Will send for him."

[Signed] F. R. KRLLY, Chief of Detectives In his drunken talk Wilson told of the borrible mapping in which he billed American

horrible manner in which he killed Anthony Dale, a farmer of Ivy Illii, Pa., in thony Dale, a farmer of Ivy Illii, Pa., in Sebruary, 1384; how, after he nad worked for him he saked for money, and on being rejused visited a neighboring village and got crazy drunk Returning he stealthiy entered the sleeping room of Dale, and, picking up a meat cleaver, brained the sleeping victim. The details following are almost too horrible to relate. The murderer deliberately hacked the body to nieces, sewed the severed members in murderer deliberately hacked the body to pieces, sewed the severed members in a bag and dumped them into the Wissahikon River. When sufficiently sobered to relize the terrible deed he had sommitted, he fied the country, arriving in Children the country are want. sobered to relize the terrific deed that committed, he fled the country, arriving in Chicago after almost two years' wanderings. Wilson was seen in his cell at the police station Monday night. He is twenty-seven years of age and a native of Nova Scotla, where his parents and relatives now reside. He is a man of small stature and puny frame, looking anything but the horrible murderer he apparantly is. Since he came to this city he has worked for a milkman on Wentworth avenue. About two weeks ago he met a child greatly resembling that of the murdered man. At the sight of the little one, the old feeling of remorse returned and, he says, drove him into a frenzy. Since then he has known no peace of mind, and on Saturday night he got since then he has known night he got drunk and on Saturday night he got drunk and hired a boy to take him to a police scation, where he made his starting confession. When told that his story had been verified by the Philaddistory had been verified by t story had been verticed by the phia detectives, Wilson expressed no surprise. If anything, he appeared pleased at the information. As to his punishment, he appears careless. He says he would rather not be hanged, but seems to think that that will be his fate.

GOÓD WALKING,

The Overworked and Underpaid Street Car Employes of St. Louis Strike.

Their Most Reasonable Demands Entirely Ignored by the Officers of the Grasping Corporations,

And Hundreds of Thousands of Citizens

and Guesta Put to Untold Inconvenience. St. Louis, Mo., October 7.-The dread that St. Louis street-car employes would strike this week has been fully re-

alized. The fiat has gone forth, and the fight goes on. Fortunately, however, all the avenues of communication north and south and cast and west are not closed. The Franklin avenue men have always been treated liberally by their employers, and they did not join issues with their less fortunate conference. The South St. Louis Company came to terms with their men yesterday morning, granting all that was asked, and thus north and south one avenue of passenger traffic was preserved. The other companies, however, refused to make any concessions. The Executive Committee of the strikers remained firm. They argued that all would be lost by delay. At eleven o'clock the committee met at the Lactede'Hotel 'to confer with the Presidents of various roads. The conference was practically without result. Mr. Johnson, the President of the South St. Louis Line, was present, and merely ratified the promises he made to the men when they took their cars out. The terms of the agreement are: Twelve hours a day, with fifteen minutes for meals; that all the men engaged on the road shall be Ringhts of Labor; that conductors shall be paid \$2 per day and drivers \$1.75.

Clear Water-Give Thanks. To-day Engineer Loring began the work of constructing a lateral filter at the water vorks, that the city may be able to furnish consumers clearer and purer water. The plan adopted has been talked of by Engineer Barnett for a number of years. It s to construct a trench 10 feet wide and 18 feet deep, extending from the T at the east end of the big filter to the bed of the river, having a flood gate at the river's edge. Between the river and the T will be built sectional rooms, the first to be filled with boulders, the second vacant, the third filled with pebbles, the fourth vacant, the fifth with sand, the sixth vacant, and the seventh at the entrance to the filter filled with a pair of large wire mattresses filled with charcoal through which the water will finally flow ready for use. It will be demonstrated first that this plan is satisfactory, when another lateral filter will be built. The cost | tion when Clerk Betzer proceeded to read of the one now in course of construction the following resolutions presented by will be about \$500. If it works well, as Chairman Oakes, Muzzy and Gogerty, it doubtless will, the money will be well of the gas committee:

Heip ireland. There should and doubtless will be a arge turn out at the public meeting to be held at the court house to-morrow evening, under the auspices of the Irish Aid Association, of which Mr. John Mc Evoy is president. The meeting will be addressed by Hon. John M. Graham and other gifted speakers, who will fully explain the present condition of affairs in providing euch contract shall be sub-Ireland and will speak of the bright future of her people, if the patriots of America and all lovers of universal freedom will come to the front now, at this critical period, and help with their means to aid the struggling and long-suffering inhabitants of the Emerald Isle, who now cry for assistance. Decatur is asked for a liberal contribution to sid in the success of the pending elections, so that the Irish representatives who are striving to get into parliament may be in position to bring about in a legitimate way the long-sought-for relief to their constituents. Nearly every town in America is answering the call for help that comes scross the water, and Decatur should do her best to-morrow night.

THE Von Elener Concert Company from Bloomington, appeared at the opera house last night before a very select audience-there being less than 60 people present. The numbers on the programme were given by George Morse, pianist, Olof Bull, violinist, Don, Von Elsner, cornetiet, Emma Von Elener, younger sister of Litta, vocalist. Judging from the applause which greeted Miss Von Elsner she made a flue impression. She has a splendidly cultivated voice under full control. Don and Prof. Bull acquitted hemselves with their usual skill. The exodus of music lovers to Chicago and St. Louis was probably the cause of the alim attendance.

BLECTRIC LIGHT. The chief object of the session was to consider the purchase of a Jenney Electric Light plant of 60 light limit for Decatur, a matter that has been considered members of the gas committee for a period of six weeks-in fact, ever since the memorable visit to Danville. The reporters and the spectators were all atten-Resolved, That in the opinion of th

council it is for the best interests of the city and the citizens of Decetur that some plan be adopted by which the streets of the city should be lighted by electricity, and that the city should be come the owner of the plant in the near future; and Resolved, That the gas committee, the

mayor and the city attorney be directed to enter into a contract with the Jenney Electric Light Company of Ft. Wayne, that will accomplish the above objects, mitted to this council for approval and that until such approval said contract shall have no binding force upon the

Ald, Durfee asked that the resolution lay over until the November meeting, but as there was no second, Ald. Gogerty moved the adoption of the resolution. Ald. Muzzy made remarks favoring the adoption of the resolution. Ald. Durfee wanted it understood that he was not opposed to electricity, but that in his opin ion the council should go slow in the mat ter of expenditure of money beyond the limit, and he stated that at present electricity for street illumination was an experiment. He urged that there be no hurry in acting on the resolution, and that time be taken to consider the ques-

tion in all its bearing. Mr. McDonald, the representative of the Jenney company, being present, on invitation he addressed the council on the plan of placing a plant in Decator. He stated that he had been in consultation with the gas committee with reference to lighting the city by electricity, and would suggest that a plant or eight electric light towers, each 125 feet high, and each with five lights at the top, and ten low lights, be purchased to properly light the city. He read testimonials endorsing the light and gave details as to the construction of the plant. The plan is to have the engine at the water works: that the plant will cost the city \$16,000 and \$2,000 for running expenses. Mr. McDonald stated that the company is ready to accept any reasonable obligation from the city, and that all the time want-

ed for payment would be granted. Ald. Muzzy added a few remarks on the subject, stating the facilities for steam power for the plant at the water works were ample for the dynamos of 60 light

Ald. Oakes remarked that the present cost of half lighting the city is \$4,000 a year, and that if the city was properly illuminated by gas and gasoline, the expense would reach nearly \$8,000. He looked upon electricity as a fixture for street lighting. He thought there might be improvements in appliances, but he didn't believe that Decatur should wait until some neighboring city of enterprise should get a light so bright that it would

On the call of syes and mays on the notion to adopt the resolution, Aldermen Hogerty, Oakes, McClellau, Muzzy, Fermson and Whitsel voted in the silinase. Therman who was undecided how motion to adopt the resolution, Aldermen Gogerty, Oakee, McClellau, Muzzy, Ferguson and Whitsel voted in the affirmative. Ehrman, who was undecided how to vote at present, said nay, and Durfee favor of the Jenney system to 8, with a strong probability that Ehrman will also join in the spirit of advancement and ultimate economy in the matter of giving the people good illumination for the

of the purchase of the plant. The committee reported in favor of cobbling a part of Wood street, near Ohurch. Referred back for estimate of

If the city decides to purchase the Jenney Electric Light plant to illuminate the streets, there will be a total outlay in two or three years of \$18,400, divided as follows:

The outfit will include two improved dynamos, each 30-light cower, 8 tower lights, five lamps on each, and each tower 125 feet high; also 10 drop lights for intersection of streets, to light up in all its bearing by the enterprising heavily shaded thoroughfares, an engine and supplies generally. It is the intention to put one tower in the center of the committee with Ald. McClellan paid that old square, one on the H. C. Johns' property, southeast of the city, two in the vi cinity of the Union depot, one north of the city, one in the third ward, one in the second ward, ad one between the city park and the Union depot at the most suitable point. Ald. Oakes said last night that it now |costs \$4,000 a year for gas and gasoline, including other necessary expenses, and that unless electricity is secured \$8,000 a year should be expended for the present light to give satisfaction. The policy of the council is to buy an electric light plant, furnish its own light at a great saving of money, and eventually put in more dynamos and supply private parties with light. Let the good work go on.

A large and appreciative audience withesed Prof. Geo. Bartholomew's Equine Paradox, at the Opera House, last night. The Professor has complete control over his school of horses and speaks to them when giving his orders the same as if they were human beings. The horses understand over 400 different commands, comprising a vocabulary of over 18,000 words; know their own name and numbers, and those of the scholars. They like to be on the stage, and enjoy the performance. Sometimes when a horse is negligent, those next to him will urge him out and in various ways chastise him if he falls to perform properly or promptly. They show their appreciation of the audience's favors by bowing. Not to go into detail with each particular horse and its act, it will suffice to say that Neilio is the invorter with the audience. She is intelligent and active, and always doing her part in a good deal of horse same. He designates colors, knows the difference between a circle and a figure 5, and lies down and goes to sleep. The horses are all well kept, well taught, and most of the pupils of Prof. Bartholomew's school are better behaved than the average school boy. All in all the exhibition is accol-
